

Clinical Research Support Unit

Provision of administrative research support to research teams working within the Acute Perinatal Program at BC Women's

Erin MacRae
APP Research Coordinator
604.875.2000 ext 4875
pager 41-01517
emacrae@cw.bc.ca

This position was created to coordinate research operations within the Acute Perinatal Program (APP) at BC Women's Hospital.

In the context of clinical research support, I am available:

- To all researchers planning or currently performing research within the Acute Perinatal Program (Admitting/Assessment; LDR/OR; Cedar/Holly, Fir Square, Evergreen, Dogwood, Arbutus, Balsam).
- If you are developing a research protocol and require background information on routine hospital operations/policies (provided either by myself or an appropriate contact person).
- If you are planning on launching a study in any of these areas and want to educate, promote, and inform staff about your study.
- If you are looking for protocols/recommendations for optimal recruitment strategies for studies taking place in these areas.
- In development of research resources and policies for staff and patients

This role is additionally responsible for:

- monitoring all active and upcoming research studies within the APP
- advising hospital management on the APP capacity for research
- trouble-shooting/ problem-solving
- communication between hospital and research
- promotion of research awareness with new and existing hospital staff
- standardization of research policies/procedures
- refining specimen collection procedures
